## **PRESS RELEASE**

### **The First Sub Surface Survey Project uses aircraft technology for the PHE Airbone gravity Mamberamo Project - Papua**

Jakarta, 10 February 2023 – PT Elnusa Tbk (Elnusa, IDX: ELSA), a leading energy services company incorporated in Pertamina's Upstream Subholding, implemented a Virtual Management Walkthrough (VMWT) to a Full Tensor Project using the Airborne Gravity Gradiometry and Magnetic Acquisition, Processing & Interpretation Method. - Package 1, Mamberamo – Papua.

This project is the first project at Elnusa that uses aircraft technology for survey purposes, mapping subsurface structures for a larger area and faster acquisition. In this project Elnusa is also working with PT Airfast Indonesia as an aircraft provider and PT Xcalibur as a technology provider.

VMWT officials present were Elnusa's Director of Business Development Ratih Esti Prihatini, Corporate Secretary Asmal Salam, Senior Manager Financial Accounting Ante Maulana, Senior Manager Procurement Teguh Indra Dwiyono, and all the teams currently operating.

Geophysicist Elnusa Solehudin said "Elnusa has started work in the 4th quarter of 2022, currently the area that Elnusa has worked on has reached 92.1% of the target and this work is predicted to be completed in mid-February 2023."

Elnusa Director of Business Development, Ratih Esti Prihatini, on this occasion said "Even though this is our first project using aircraft technology, I hope we can learn a lot of lessons and technology transfer regarding the technology used in this project".

"This work is a high risk job. So I urge all workers there to work safely and continue to prioritize safety and work professionally, because safety is the most important thing." Ratih concluded.

**About Elnusa (IDX: ELSA)**

*Elnusa is a subsidiary of PT Pertamina Hulu Energi (PHE) incorporated in Subholding Upstream Pertamina. As a total energy services solution company, Elnusa has core competencies in upstream oil and gas services, supporting services, and energy distribution and logistics services. The upstream oil and gas service line includes Geoscience & Reservoir services (land, transition zone & marine, and data processing), oil and gas field drilling & maintenance services (drilling & workover), engineering, procurement, construction & operation maintenance (EPC-OM) services. Supporting service lines include marine support services, fabrication, to data management. The energy distribution and logistics service line includes fuel transportation services, depot management, and chemical sales. Currently, Elnusa serves national and international oil and gas companies, including Pertamina Group, British Petroleum, Conoco Phillips, Soco Exploration (Vietnam) Ltd, etc. Elnusa is listed on the Indonesia Stock Exchange with the issuer code 'ELSA' and has five subsidiaries that support its competence.
