Press Release

Elnusa Ready to Maintain Energy Supply at Christmas and New Year, Prepare Excellent Fleet and Human Resources in All Operational Areas

Jakarta, 22 December 2023 – PT Elnusa Tbk (Elnusa), through its subsidiary Elnusa Petrofin (EPN) has again received the mandate to support the Christmas 2023 and New Year 2024 (Nataru) Task Force of PT Pertamina Patra Niaga. The Nataru Task Force will start from December 15 2023 to January 7 2024. The role of the Nataru Task Force is very important in maintaining energy availability. It is predicted that around 43% of community movements will increase in this time period when compared to last year. In this Task Force, EPN is taking part in supporting Pertamina Patra Niaga in distributing energy throughout the country in order to maintain energy security.

In carrying out the duties of the 2023-2024 Nataru Task Force, EPN has prepared several things to support PT Pertamina Patra Niaga in maintaining energy security, especially during this time period. In Operational Excellence, EPN prepares human resources and vehicles that will operate in all operational areas. For the readiness of the Tank Car Crew (AMT) who will operate the car, EPN has prepared 5,894 AMT. Apart from that, EPN is also preparing backup mobilization of AMT from other locations to locations significantly affected by the Nataru task force.

In terms of Tank Car (MT) fleet readiness, a total of 1,947 units are prepared to distribute energy throughout the country. EPN also ensures that all facilities and operational vehicle units have been calibrated and upgraded and are in good condition. Apart from Regular Tank Cars (MT), EPN also provides 222 MT Spot Charters spread across Nataru Task Force locations.

The Tank Car Crew (AMT) serving in the 2023-2024 Nataru task force have the relevant competencies and certifications needed to carry out their work. Training for AMT has also been carried out throughout 2023.

To ensure that the distribution of BBM/BBK runs smoothly and safely during the Task Force, the Area Distribution Control Center Team (PKDA) operates 24 hours every day to monitor the delivery of BBM/BBK and the driving behavior of the Tank Car Crew (AMT) in real-time. The PKDA team is spread across 6 operational areas such as Medan (Sumbagut Region), Palembang (Sumbagsel Region), Surabaya (Jabalinus Region), Balikpapan (Kalimantan Region), Makassar (Sulawesi Region), and Jayapura (Maluku Papua Region).

As a complement to security, the Tank Car is installed with CCTV with artificial intelligence (AI) technology and GPS Two Ways Communication which can detect fatigue, yawning, smoking and making telephone calls by AMT. The PKDA team can immediately intervene when there is a violation in driving behavior by AMT, by making direct contact via GPS Two Ways Communication.

In terms of LPG supply, EPN also ensures maintaining the stability and availability of LPG in the Amurang LPG Depot operating unit area, namely in the South Minahasa, Manado, Gorontalo and EPN SPBE and SPPBE operational unit areas such as in Bima, West Nusa Tenggara, Plumpang DKI Jakarta, and Gunungsitoli. North Sumatra.

EPN Director of Operations and Marketing Mr. Nur Kholis said, "Everything that has been prepared is our commitment to support Pertamina Patra Niaga to ensure the smooth supply and distribution of fuel and LPG to the public during Christmas 2023 and New Year 2024," said Nur Kholis.

Nur Kholis added that apart from the readiness that has been explained, EPN ensures that all parties involved carry out their duties according to applicable HSSE principles. Because HSSE is the main thing so that all operations can run well. And personnel who carry out their duties can also maintain their health. Therefore, health and safety checks are carried out for all personnel on duty. Be it Daily Fit to Work, Medical Check Up, Giving Vitamins, to Extra Fooding.

"We coordinate internally both within EPN and within the Pertamina Group. "Apart from that, we also involve external parties including the apparatus to support the smooth operation of energy distribution," added Nur Kholis.

With fleet readiness and qualified human resources, EPN is ready to carry out its duties optimally to support Pertamina Patra Niaga in maintaining energy security, especially during the Christmas and New Year 2023-2024 period.

About Elnusa (IDX: ELSA)

Elnusa is a subsidiary of PT Pertamina Hulu Energi (PHE) incorporated in Subholding Upstream Pertamina. As a total energy services solution company, Elnusa has core competencies in upstream oil and gas services, supporting services, and energy distribution and logistics services. The upstream oil and gas service line includes Geoscience & Reservoir services (land, transition zone & marine, and data processing), oil and gas field drilling & maintenance services (drilling & workover), engineering, procurement, construction & operation maintenance (EPC-OM) services. Supporting service lines include marine support services, fabrication, to data management. The energy distribution and logistics service line includes fuel transportation services, depot management, and chemical sales. Currently, Elnusa serves national and international oil and gas companies, including Pertamina Group, British Petroleum, Conoco Phillips, Soco Exploration (Vietnam) Ltd, etc. Elnusa is listed on the Indonesia Stock Exchange with the issuer code 'ELSA' and has five subsidiaries that support its competence.
